

CLEAN VERSION OF AMENDED CLAIMS

✓
Please replace pending claims 1, 21 and 34 with the following:

-
- A⁸
1. (Amended) A method for treating an inflammation or lesion caused by a virus, comprising contacting said inflammation or lesion with a virucidally effective amount of a composition consisting essentially of 0.2 to 30% by volume of a C1, a C2, or a C3 alcohol or a C2, C3, or C4 diol, and a sufficient amount of an acid to adjust the pH of the composition to between 2.45 and 4.6.
-
- A⁹
21. (Amended) A method for treating an inflammation or lesion caused by a virus, comprising contacting said inflammation or lesion with a virucidally effective amount of a composition consisting essentially of 0.2 to 30% by volume of an alcohol selected from the group consisting of methanol, ethanol, 1-propanol, 2-propanol, 2,3-butanediol, 1,2-butanediol, 1,3-butanediol, and 1,4-butanediol, and a sufficient amount of an acid to adjust the pH of the composition to between 2.45 and 4.6, wherein said acid selected from the group consisting of glycolic acid, lactic acid, succinic acid, malic acid, citric acid, acetic acid, and hydrochloric acid.
-
- A¹⁰
34. (Amended) A method for treating an inflammation or lesion caused by herpesvirus, comprising topically applying to said inflammation or lesion a composition consisting essentially of 10% by volume ethanol and 0.6% by weight glycolic acid, wherein the pH of the composition is about 2.45.
